

Added portion for ERD:

We added two new fields, Customer Email and Room Deposit, to the Sleep-Tite Motel's computer system. The Customer Email field lets the motel talk to its guests easily using email. They can send booking confirmations, reminders, and ask for feedback after the stay. They can also send special offers and keep in touch with their guests better.

The Room Deposit field helps the motel keep track of money from customers when they book a room. Customers may need to pay a deposit to reserve a room. This field stores that information and helps the motel know how much money they have received in advance. It also makes sure the motel knows if a guest needs a refund when they check out. This helps the motel manage their money and keep everything fair and secure for guests. With these new fields, Sleep-Tite Motel can work more efficiently and give their guests a better experience.
